Competing Economic Paradigms in China May 19 2021 When the Chinese economic reforms began in 1978, Marxist economics infused all the institutions of economic theory in China, from academic departments and economics journals to government departments and economic think tanks. By the year 2000, neoclassical economics dominated these institutions and organized most economic discussion. This book explains how and why neoclassical economic theory replaced Marxist economic theory as the dominant economics paradigm in China. It rejects the idea that the rise of neoclassical theory was a triumph of reason over ideology, and instead, using a sociology of knowledge approach, links the rise of neoclassical economics to broad ideological currents and to the political-economic projects that key social groups inside and outside China wanted to enable. The book concludes with a discussion of the nature of economic theory and economics education in China today.

Oswal - Gurukul Economics Most Likely Question Bank : ISC Class 12 for 2023 Exam Jan 27 2022

Introduction to Islamic Economics Nov 12 2020 Gain deeper insight into the principles and theory of Islamic economics Introduction to Islamic Economics: Theory and Application provides an overview of the organizing principles and fundamentals of an Islamic economy. With deep discussion of the characteristics, rationale, key institutions, objectives, and instruments at work, the book addresses the core economic principles underlying a system based on the foundational teachings of Islam, and examines the implications for economic policies. Social welfare, economic justice, market functionality, efficiency, and equity are explored from an Islamic perspective, and the role and instruments of fiscal and monetary policy in Islamic systems are used to illustrate contemporary applications. Universities around the globe are offering courses on Islamic economics and finance, but despite the industry's rapid growth, most research has been focused on the financial principles rather than underlying economic principles. The first book of its kind, Introduction to Islamic Economics brings all the key concepts together into one reference volume. By outlining the ways in which Islamic finance and Islamic economics interrelate, this book can help readers to: Develop an understanding of the Islamic economic system and its institutional scaffolding Differentiate between the major characteristics of the dominant conventional economy and one based on the fundamental sources of Islam Understand the conditions that must be met for a just, well-balanced, stable, and growing economy Clarify the role of State, public policy, and risk-sharing in the Islamic financial system The Islamic financial system is expanding quickly, and those looking to increase their relevance in a changing economic landscape must get up to speed. Introduction to Islamic Economics provides a comprehensive overview of underlying economic system offering a deeper understanding of the feature of the system. This book is an excellent complement to Introduction to Islamic Finance, 2E by Iqbal and Mirakhor.

Open-Economy Macroeconomics Jan 03 2020 The integration of market economies is one of the most remarkable features of international economics, which has important implications for macroeconomic performance in open economies. Equally important is the declining relevance of the real versus the monetary theory dichotomy. These papers focus on those aspects of monetary policy which relate to credibility and non-neutrality; the domestic adjustment to foreign shocks; the interdependence of open economies and their strategic interactions. An important section is also devoted to the innovative modelling of exchange rate dynamics.

Books in the Library of Nelson W. Aldrich, Warwick, Rhode Island: Economics. pt. 2. Literature, history, etc Oct 12 2020

Relational Anthropology for Contemporary Economics Aug 10 2020 This open access book offers a multidisciplinary dialogue on relational anthropology in contemporary economics. A particular view of the human being is often assumed in economic models, but seldom acknowledged let alone explicated. Addressing this neglected area of research in economic studies, altogether the contributors touch upon the importance and potential of virtues, the notions of freedom and self-love, the potential of simulation models, the dialectics of love, and questions of methodology in constructing a relational anthropology for contemporary economics. The overall result is a highly informative and constructive dialogue, establishing inter alia a research agenda for future collaborative and multidisciplinary study.

Cambridge University Reporter Jun 19 2021

Socio-economics of trawl fisheries in Southeast Asia and Papua New Guinea Feb 02 2020 These studies on the role of trawl fisheries for food security and the potential impacts of management measures reveal major differences across countries in fishing practices, including crew demographics and income-sharing arrangements.

International Economics Jun 07 2020 Written from a European perspective, this text offers coverage of all the key elements of international economics: trade, money and finance. A firm emphasis is placed on ensuring that students understand how the theory relates to real world examples, providing undergraduate students with everything they need to understand this course. Empirical and Political detail is given close attention. International Economics contains 32 chapters split into 2 parts with part one covering International Trade and Part two covering International Money. A comprehensive online study guide for students will support the text with further this text is supported by an Online Resource Centre that includes a comprehensive study guide to assist students in reinforcing what they have learnt and preparing for exams.

The Idea of History in Constructing Economics Dec 02 2019 How scientific is economics? This question has often been framed by analogies and correspondences made between economics and other, seemingly more well-established scientific disciplines, starting with classical mechanics. At the same time economics is likely to be seen in opposition to or in contrast with history, where the reliance upon generalizing rules, thought experiments, and model construction in economics is set against the amassing of particular facts intended to create narratives in history. In this new volume, Turk explores the relationship between economics and history, including the often fraught one between economics and economic history, making the case that economics does in fact require the proper grounding in history that has so often been ignored. This work challenges the attempt to link economics with other, more clearly 'scientific' disciplines as flawed and fundamentally wrongheaded. A key element of this book is its examination of the gaps and associations that exist in, or are seen through, linkages with thermodynamics, classical mechanics, biology, literature, mathematics, philosophy, and sociology. This exploration is frequently undertaken through study of the work of one or more major figures in the history of economic thought, ranging from Quesnay and Smith, through Walras and Max Weber, to Robinson, Krugman, David, and Arthur. Through the possibility of an alternative to the gaps noted in each such comparison, the underlying, necessary connection between economics and history can be brought out. The book concludes by exploring the basis for the positive construction of a historical economics. This book is suited for those who study history of economic thought and philosophy of economics.

CBSE New Pattern Economics Class 12 for 2021-22 Exam (MCQs based book for Term 1) Feb 25 2022 1. This book deals with CBSE New Pattern Economics for Class 12 2. Economics Sep 30 2019

Evidence-based Decisions and Economics Apr 05 2020 The need for evidence-based decisions that take account of both effectiveness and economics is greater now than ever. Using casestudies and illustrative examples throughout the authors describe how the activities and outputs of evidence synthesis, systematic review, economic analysis and decision-making interact within and across different spheres of health and social policy and practice. Expanding on the first edition the book now covers approaches to evidence synthesis that combine economics and systematic review methods in the applied fields of social welfare, education and criminal justice, as well as health care. Written by economists and health services researchers closely involved in developing evidence-based policy and practice it showcases current state-of-the-art methodology and will be an invaluable read for all policy-makers and practitioners using evidence to inform decisions, analysts conducting research to support decisions and students discovering the need for evidence-based decisions to incorporate economic perspectives and evidence.
