configuring intervlan routing and isl 802 1q trunking on a cisco Apr 08 2021 nov 22 2005 this document provides sample configurations on interswitch link isl and 802 1q trunking between a catalyst 3512 xl switch and a cisco 2600 router the results of each command are displayed as they are executed cisco 3600 and 4500 4700 series routers or other members of the cisco 2600 series routers with fastethernet interfaces and any catalyst

cisco cli switch commands cheat sheet pdf networks Oct 22 2019 the following commands will work on most cisco switch models such as 4500 3850 3650 2960 3560 etc verification

commands testswitch show version enable half duplex
configuration on switch port setting web based interface for
configuration gui myswitch config ip server

reset a cisco 2960 switch to factory default settings Feb 24
2020 may 28 2013 mike june 29 2018 my buddy did give me
an idea though which didn't really apply to me but would apply
to someone not wanting to lose their config instead of deleting
config.txt and vlan.dat you could rename them config.old and
vlan.old then when you log back into the switch go into
privileged mode then rename those files back to their original
config.txt
