metamorphism and
metamorphic rocks
7 2 classification of
metamorphic rocks
there are two main
types of
metamorphic rocks
those that are
foliated because
they have formed in
an environment
with either directed

pressure or shear
stress and those
that are not foliated
because they have
formed in an
environment
corundum
wikipedia Jan 31
2020 corundum is a
crystalline form of
aluminium oxide al
2 o 3 typically
containing traces of
iron titanium
vanadium and
chromium it is a
rock forming
mineral it is a
naturally
transparent
material but can
have different
colors depending on
the presence of
transition metal
impurities in its
crystalline
structure corundum
has two primary
gem varieties ruby
and sapphire
