The United States in the Indo-Pacific Jun 01 2020 This electronic version has been made available under a Creative Commons (BY-NC-ND) open access license. This edited collection examines the political, economic and security legacies of former US President Barack Obama in Asia and the Pacific, following two terms in office between 2009 and 2017. In a region that has only become more vivid in the American political imagination since Obama left office, this volume interrogates the endurance of Obama's legacies in what is increasingly reimagined in Washington as the Indo-Pacific. Advancing our understanding of Obama's style, influence and impact throughout the region, this volume explores dimensions of US relations and interactions with key Indo-Pacific states including China, India, Japan, North Korea and Australia; multilateral institutions and organisations such the East Asia Summit and ASEAN; and salient issue areas such as regional security, politics and diplomacy, and the economy. How far has the Trump administration progressed in challenging or disrupting Obama's Pivot to Asia? What differences can we discern in the declared or effective US strategy towards Asia and to what extent has it radically shifted or displaced Obama-era legacies? Including contributions from high-profile scholars and policy practitioners such as Michael Mastanduno, Bruce Cumings, Maryanne Kelton, Robert Sutter and Sumit Ganguly, contributors examine these questions at the halfway point of the 2017–21 Presidency of Donald Trump, as his administration opens a new and potentially divergent chapter of American internationalism.

Confessions of an Illuminati, Volume I Mar 22 2022 Leo Lyon Zagami uses the internal documents of the Illuminati to reveal confidential and top-secret events. His book contends that the presence of numerous Illuminati brotherhoods and secret societies—just as those inside the most prestigious U.S. universities such as Yale or Harvard—have always been guides to the occult. From the Ordo Templi Orientis (OTO)'s infiltration of Freemasonry to the real Priory of Sion, this book exposes not only the hidden structure of the New World Order and the occult practices, but also their connections to the intelligence community and the infamous Ur-Lodges.

Modern Imperial Presidency Begin with President Nixon Apr 11 2021 COMING OBAMACARE DESTRUCTION INJECTION: SIRMANS LOG: 23 JANUARY 2015, 1515 HOURS.I THINK BY APRIL 15TH PLUS 30 DAYS WE WILL HEAR THE FIRST RUMBLINGS COMING FROM THE ECONOMIC VOLCANIC ERUPTION THAT MAY LEAD TO A TOTALLY USA ECONOMY COLLAPSE. WE'LL SEE, THE WAIT WON'T BE MUCH LONGER.INJECTION END.IDEOLOGY INJECTION: SIRMANS LOG: 21 JANUARY 2015, 1249 HOURS I have never in my life advocated for a lower minimum wage because that is even more sinister than a higher minimum wage to the destruction of a true free market place economy. My whole effort on trying to help save the USA and western civilization is repealing or getting rid of any wage or price controls entirely, vamooses. Getting rid of all shackles and restrictions like any wage or price controls is the only way to let loose the miracle working power of a true free market place economy. That way it will have the discipline and power to kick ass and do whatever it may take to save the USA and western civilization. Otherwise, western civilization might as well start preparing to be on its knees praying five times a day. The fact is western civilization is going to lose this ideology war not in battle but by actually destroying itself. That being said, all the opposing foe needs to do is just walk in and take over. Right now in the USA alone when this Obamacare insanity collapses the USA economy we are going to be so busy at each others throat, hell, I don't know what to expect. All I can do is pray that I'm not losing my cotton picking mind by letting my imagination get out of control. Bartender, give me your strongest shot of whiskey, make it a double. There, that should stop any more drift from reality. INJECTION END.ECONOMIC INJECTION: SIRMANS LOG: 20 JANUARY 2015, 2108 HOURS.USA ECONOMY COLLAPSES DUE TO OBAMACARE, MONEY IS WORTHLESS, NO GOVERNMENT CHECKS FORTHCOMING. NOW, IF YOU THINK THAT CAN'T HAPPEN, THEN YOU'RE A FOOL. YOU DON'T KNOW HISTORY; THERE HAS NEVER BEEN A GOVERNMENT THAT DIDN'T FAIL AT SOME POINT. I CONSIDER IT A CRIME AGAINST HUMAN SURVIVAL FOR ANY GOVERNMENT TO SEDUCE AND MAKE MILLIONS UPON MILLIONS OF PEOPLE SOLELY DEPENDENT ON ANY SYSTEM OTHER THAN THE NUCLEAR AND EXTENDED FAMILY SYSTEM. CREATING A WELFARE STATE IN THE FIRST PLACE IS JUST PLAIN SOCIETAL SUICIDE. INJECTION END.I see where the USA and Western Europe leadership are

brainstorming and scratching their heads on how to solve the immigration problem, the terrorist problem, the economy problem, etc. Well, as a self-made writer I'm fixing to let her rip. I am not about feel good talk and exercises in futility because in terms of sheer survival winning is everything. There is no sense of me going back over the destruction of what government as a social and family provider along with the welfare state has done to western civilization. It is very simple "We can't have our cake and eat it too." I think anyone today with an ounce of economic wisdom should know that western civilization cannot and will not survive as welfare states. And anyone that thinks I'm wrong on this is an educated fool. The old folks used to always say, "An educated fool is the worst kind." I'm warning you, one way or another the days of the welfare state is bankrupt and over. The sooner the USA and Western Europe realizes that fact the better all of our chances of surviving will be. If you mention "Survival instinct" very few today know what the hell you are talking about. Well, I will tell you what I think it is, the harder the struggle in life the greater it is, the least the struggle in life the least it is. No one has to tell one with a strong survival instinct that there is no bright future for a civilization with same sex marriages, mass murdering in the womb, and birth control galore. Who is going to produce future generations? Duh! No need for me to nag or preach about morals, today very few give a damn anyway, I'm considered to be the nut case and odd man out.

The US-China Military and Defense Relationship during the Obama Presidency Apr 30 2020 This book offers a timely and compelling explanation for

the deterioration of U.S.-China security relations during the Obama Presidency. The U.S.-China relationship has become one of (if not the most) vital features of contemporary world politics, and with arrival the Donald Trump to the White House in 2017, this vital geopolitical relationship sits at a precarious and dangerous crossroads. This book assesses a wide array of sources to systematically unpack the policy rhythms, drivers, and dynamics that defined the course of Sino-American security relations during the Obama-era. It fills several gaps in the literature on international security and conflict and offers a nuanced and innovative comparative approach to examine individual military domains. The case study chapters draw on recent Chinese and English sources - on military doctrine, capabilities, and defense strategy - to build a clear understanding the main sources of U.S.-China misperceptions, and highlight the problems these assessments can create for the conduct of statecraft across strategically competitive geopolitical dyads. The book builds a sobering picture of U.S.-China relations that will appeal to specialists and generalists alike with an interest in future warfare, emerging military-technologies, military studies, arms control, and foreign policy issues in the Asia-Pacific region more broadly.

After the Last Border Jul 02 2020 "Simply brilliant, both in its granular storytelling and its enormous compassion" --The New York Times Book Review The story of two refugee families and their hope and resilience as they fight to survive and belong in America The welcoming and acceptance of immigrants and refugees have been central to America's identity for centuries--yet America has periodically turned its back in times of the greatest humanitarian need. After the Last Border is an intimate look at the lives of two women as they struggle for the twenty-first century American dream, having won the "golden ticket" to settle as refugees in Austin, Texas. Mu Naw, a Christian from Myanmar struggling to put down roots with her family, was accepted after decades in a refugee camp at a time when America was at its most open to displaced families; and Hasna, a Muslim from Syria, agrees to relocate as a last resort for the safety of her family--only to be cruelly separated from her children by a sudden ban on refugees from Muslim countries. Writer and activist Jessica Goudeau tracks the human impacts of America's ever-shifting refugee policy as both women narrowly escape from their home countries and begin the arduous but lifesaving process of resettling in Austin--a city that would show them the best and worst of what America has to offer. After the Last Border situates a dramatic, character-driven story within a larger history--the evolution of modern refugee resettlement in the United States, beginning with World War II and ending with current closed-door policies--revealing not just how America's changing attitudes toward refugees have influenced policies and laws, but also the profound effect on human lives.

The Global Governance of Climate Change Sep 28 2022 Climate change control has risen to the top of the international agenda. Failed efforts, centred in the United Nations, to allocate responsibility have resulted in a challenge now reaching crisis stage. John J. Kirton and Ella Kokotsis analyse the generation and effectiveness of four decades of intergovernmental regimes for controlling global climate change. Informed by international relations theories and critical of the prevailing UN approach, Kirton and Kokotsis trace the global governance of climate change from its 1970s origins to the present and demonstrate the effectiveness of the plurilateral summit alternative grounded in the G7/8 and the G20. Topics covered include: - G7/8 and UN competition and convergence on governing climate change - Kyoto obligations and the post-Kyoto regime - The role of the G7/8 and G20 in generating a regime beyond Kyoto - Projections of and prescriptions for an effective global climate change control regime for the twenty-first century. This topical book synthesizes a rich array of empirical data, including new interview and documentary material about G7/8 and G20 governance of climate change, and makes a valuable contribution to understanding the dynamics of governing climate change. It will appeal to scholars, researchers, and policy makers interested in the dynamics behind governance processes within the intergovernmental realm.

India's Maritime Strategy Jan 28 2020 The first book by a former Indian naval intelligence officer on Sino-India relations, India's Maritime Strategy provides a unique insight into the Indian Navy, tracing its post-independence growth and discussing its transformation and future in the 21st century. In

the context of the rise of China's maritime power in the Indian Ocean, this book provides a nuanced view of the extent and scope of India's maritime reach and the effect of this on Sino-Indian competition. Challenging the view that by developing a favourable environment alone, India could seek to maintain its balance of power with China, it is argued that despite durable bilateral security ties with most regional states, India's maritime aspirations to be the primary net security provider for the region are unsustainable in the long term. This book presents a comprehensive coverage of India's bilateral maritime security engagements with all the Indian Ocean regional states, as well as the US, France, UK and Russia. As such, it will be useful to students and scholars of Indian and South Asian politics, international relations and maritime security.

Special Operations Forces in the 21st Century Jul 22 2019 This book sets out the major social scientific approaches to the study of Special Operations Forces. Despite consistent downsizing, over the past two decades the armed forces of the industrial democracies have seen a huge growth in Special Operations Forces (SOF). Through increasing numbers of personnel and more frequent deployments, SOF units have wielded considerable influence in conflicts around the world, with senior SOF officers having led major strategic operations. This increased presence and unprecedented expansion for SOF is largely a result of the 'new' kinds of conflicts that have emerged in the 21st century. At the same time, even with this high profile in the military, policy and media and popular cultural arenas, there is relatively little social scientific research on SOF. This volume aims to fill this gap by providing a series of studies and analyses of SOF across the globe, since the end of World War II. Analysing SOF at the micro, mezzo and macro levels provides broad and diverse insights. Moreover, the volume deals with new issues raised by the use of such forces that include emerging modes of civilian control, innovative organizational forms and the special psychological characteristics necessitated by SOF operatives. It concludes with a discussion of a question which continues to be debated in today's militaries: what makes SOF 'special'? Filling a clear gap in the literature, this book will be of much interest to students of strategic studies, civil-military relations, irregular warfare, security studies, and international relations.

Global Economic Prospects, January 2015 Oct 29 2022 As in previous years, global growth disappointed in 2014, but a lackluster recovery is underway, with increasingly divergent prospects in major economies and developing countries. Looking ahead, growth is expected to rise slowly, supported by continued recovery in high-income countries, low oil prices, and receding domestic headwinds in developing economies. However, continued weak global trade growth and gradually tightening financial conditions will constrain the recovery. Risks to the outlook remain tilted to the downside. In addition to discussing global and regional economic developments and prospects, this edition of Global Economic Prospects includes four essays that analyze key challenges and opportunities currently confronting developing countries: fiscal policy as a countercyclical policy tool; causes and implications of cheap oil; weak trade that fails to act as an engine of growth; and remittances as a means of steadying consumption during sudden stops. Global Economic Prospects is a World Bank Group Flagship Report. On a semiannual basis (January and June), it examines global economic developments and prospects, with a special focus on developing countries. The report includes analysis of topical policy challenges faced by developing countries through in-depth research in the January edition and shorter analytical pieces in the June edition.

Thailand Aug 15 2021 Thailand was a key ally of the United States after WWII, serving as a bulwark against communism in Southeast Asia and as a base for US troops during the Vietnam War. In return, the US provided it with millions of dollars in military and economic aid, and staunchly supported the country's various despotic regimes. And yet, the twenty-first century has witnessed a striking reversal in Thailand's foreign relations: China, once a sworn enemy, is becoming a valued ally to the military government. In this authoritative modern history, Benjamin Zawacki tells the story of Thailand's changing role in the world order. Featuring major interviews with high ranking sources in Thailand and the US, including deposed prime minister Thaksin Shinawatra, Thailand is a fascinating insight into the inner workings of the Thai elite and their dealings with the US and China.

Liberating the Politics of Jesus Mar 30 2020 Bold, faithful, challenging – this volume uncovers the social and political implications of the gospel message by looking at Anabaptist theology and practice from a female perspective. The contributors approach the gospel from a wide range of disciplines and backgrounds, liberating the radical political ethic of Jesus Christ from patriarchal distortions and demonstrating that gender justice and peace theology are inseparable. Beautifully illustrated with pen drawings, *Liberating the Politics of Jesus* recognizes the authority of women to interpret and reconstruct the peace church tradition on issues such as subordination, suffering, atonement, the nature of church, leadership, and discipleship. The contributors confront difficult topics head-on, such as the power structures in South Africa, armed conflict in Colombia, and the sexual violence of John Howard Yoder. The result is a renewed Anabaptist peace theology with the potential to transform the work of theology and ministry in all Christian traditions.

US Policies in Central Asia Jun 13 2021 Democracy promotion, security and energy are the predominant themes of US policy in Central Asia after the Cold War. This book analyses how the Bush administration understood and pursued its interests in the Central Asia states, namely Kyrgyzstan, Tajikistan, Kazakhstan, Uzbekistan, Turkmenistan. It discusses the shift in US interests after September 11 and highlights key ideas, actors and processes that have been driving US policy in Central Asia. The author examines the similarities between the Bush and Obama administrations’ attitudes towards the region, and he points to the inadequacy of the personality focused, partisan accounts that have all too often been deployed to describe the two presidential administrations. To understand US Central Asian policy, it is necessary to appreciate the factors behind its continuities as

well as the legacies of the September 11 attacks. Using case studies on the war on terror, energy and democracy, drawing on personal interviews with Americans and Central Asians as well as the fairly recent releases of declassified and leaked US Government documents via sources like the Rumsfeld Papers and Wikileaks, the author argues that the US approached Central Asia as a non-unitary state with an ambiguous hierarchy of interests. Traditionally domestic issues could be internationalised and non-state actors were able to play significant roles. The actual relationships between its interests were neither as harmonious nor as conflicted as the administration and some of its critics claimed. Shedding new light on US relations with Central Asia, this book is of interest to scholars of Central Asia, US Politics and International Relations.

Moral Responsibility, Statecraft and Humanitarian Intervention Feb 21 2022 This book explores the moral complexity of statecraft in the context of decision-making on armed intervention in the post-Cold War era. This book adds to the debate on humanitarian intervention by analyzing the moral complexity of statecraft when confronted with situations of severe human rights violations. Through a comparative case study of President Bill Clinton administration's failure to intervene in the Rwanda genocide (1994), the George W. Bush administration's tepid response to the Darfur atrocities (2003-07), and the Barack Obama administration's leadership behind the limited U.N. intervention in Libya (2011), it explores the factors – domestic and international – that influence decision-making about humanitarian intervention. These cases show, not only how international moral concerns often compete with interest-based and domestic concerns, but how decision-makers are often confronted by competing moral imperatives. In such situations, it is often not clear which imperatives should be followed. In an increasingly interconnected world, this book examines how we expect state leaders to balance different moral responsibilities. This book will be of much interest to students of humanitarian intervention, the Responsibility to Protect, human rights, US foreign policy, African politics and IR in general.

The Atlas of Water Jan 08 2021 "Water may soon be one of our most valuable commodities. The growing demands made on a finite resource by an increasing number of people adopting urban lifestyles and western diets, coupled with a changing and less predictable climate, are putting pressure on the planet's freshwater supply as never before. By 2025, four billion people may be living in conditions of water stress. And even where water is plentiful, the poor are unlikely to have ready access to a safe, cheap supply. The new edition of this timely atlas analyzes the latest thinking and emerging issues. Completely updated, it maps the competing claims on limited water resources--made by farmers, industrialists, and householders--and investigates the nature of the resource, its uses and abuses, as well as the vexed question of how it can be managed equitably"-- Page 4 of the cover.
