The Donkey Mar 07 2021 The Donkey is a short story by Guy De Maupassant Henri René Albert Guy de Maupassant (5 August 1850 - 6 July 1893) was a popular 19th-century French writer, considered one of the fathers of the modern short story and one of the form's finest exponents. A protégé of Flaubert, Maupassant's stories are characterized by their economy of style and efficient, effortless dénouements. Many of the stories are set during the Franco-Prussian War of the 1870s and several describe the futility of war and the innocent civilians who, caught in the conflict, emerge changed. He authored some 300 short stories, six novels, three travel books, and one volume of verse. His first published story "Boule de Suif" ("Ball of Fat", 1880) is often considered his masterpiece. He delighted in clever plotting, and served as a model for Somerset Maugham and O. Henry in this respect. His stories about expensive jewellery ("The Necklace", "La parure") are imitated with a twist by Maugham ("Mr Know-All", "A String of Beads") and Henry James ("Paste"). Taking his cue from Balzac, Maupassant wrote comfortably in both the high-Realist and fantastic modes; stories and novels such as "L'Héritage" and Bel-Ami aim to recreate Third Republic France in a realistic way, whereas many of the short stories (notably "Le Horla" and "Qui sait?") describe apparently supernatural phenomena. The supernatural in Maupassant, however, is often implicitly a symptom of the protagonists' troubled minds; Maupassant was fascinated by the burgeoning discipline of psychiatry, and attended the public lectures of Jean-Martin Charcot between 1885 and 1886. This interest is reflected in his fiction. Maupassant is notable as the subject of one of Leo Tolstoy's essays on art: The Works of Guy de Maupassant. Friedrich Nietzsche's autobiography mentions him in the following text: "I cannot at all conceive in which century of history one could haul together such inquisitive and at the same time delicate psychologists as one can in contemporary Paris: I can name as a sample - for their number is by no means small, ... or to pick out one of the stronger race, a genuine Latin to whom I am particularly attached, Guy de Maupassant."

Traces of War Oct 26 2022 At the end of the First World War, the landscape of the Western Front in Flanders had been transformed into a wasteland. After the war, the population returned, faced with the enormous challenge of rebuilding the region and making it inhabitable again. All traces of the war were wiped out, leaving only what was left in the ground - what is now the archaeological soil archive. Throughout the Westhoek, 30 centimetres beneath the ground and invisible to the naked eye, the archaeological remains of the war lie dormant. This book, the first of its kind, is a compendium of the findings of ten years of First World War archaeology in Belgium. Clearly written, it looks at many spectacular finds resulting from excavations at more than 150 sites in the front-line region, and also delves into the unexpected role of the landscape as the last witness of the war. These material remains from military camps, hospitals and trenches illustrate day-to-day life at the front, while also looking at the personal fates of several of the fallen soldiers - and many horses. The text is supported by a wealth of visual data, including photographs of excavated artefacts, maps, aerial photographs and other archive material.

Executive Economics Jan 17 2022 What do economists know that business executives find useful? Economics ought to be indispensable

for business decision-makers because it deals with the issues executives face daily: what to produce, how and how much, at what price, how best to use resources (time, labor, capital), how to understand markets. Why, then, do managers often think that economists' theories are ivory-tower and impractical? Perhaps because most economics texts are mystifying, jargon-ridden, and written from every perspective except that of the line manager. In *Executive Economics: Ten Essential Tools for Managers*, Shlomo Maital brings economics down to earth, back to the hard day-to-day decisions that executives have to make. He shows how all decisions can be organized around two key questions: What is it worth? What must I give up to get it? Answering these questions depends upon finding and maintaining the right relation in the "triangle of profit" -- cost, price, and value. Each of *Executive Economics* ten chapters focuses on one or more legs of the triangle of profit, defines a decision tool, and illustrates how it can be used to improve the quality of executive decisions. Drawing on recent examples from both Fortune 500 firms and smaller companies, Maital shows why economics main contribution is to deepen executives' understanding of the structure of their costs, and to explain why some of a business's highest expenses are those that never appear on a check stub or in a profit-and-loss statement. *Executive Economics* is written for executives, about executives, and by an author who has both taught executives at MIT's Sloan School of Management for over a decade and served as a consultant to small and large businesses. It is must reading for executives who need simple, effective decision-making tools to give them an edge in today's competitive global economy.

**A German Officer in Occupied Paris** Aug 12 2021 Ernst Jünger was one of twentieth-century Germany's most important—and most controversial—writers. Decorated for bravery in World War I and the author of the acclaimed western front memoir *Storm of Steel*, he frankly depicted war's horrors even as he extolled its glories. As a Wehrmacht captain during World War II, Jünger faithfully kept a journal in occupied Paris and continued to write on the eastern front and in Germany until its defeat—writings that are of major historical and literary significance. Jünger's Paris journals document his Francophile excitement, romantic affairs, and fascination with botany and entomology, alongside mystical and religious ruminations and trenchant observations on the occupation and the politics of collaboration. While working as a mail censor, he led the privileged life of an officer, encountering artists such as Céline, Cocteau, Braque, and Picasso. His notes from the Caucasus depict the chaos after Stalingrad and atrocities on the eastern front. Upon returning to Paris, Jünger observed the French resistance and was close to the German military conspirators who plotted to assassinate Hitler in 1944. After fleeing France, he reunited with his family as Germany's capitulation approached. Both participant and commentator, close to the horrors of history but often distancing himself from them, Jünger turned his life and experiences into a work of art. These wartime journals appear here in English for the first time, giving fresh insights into the quandaries of the twentieth century from the keen pen of a paradoxical observer.

**Doing Math with Python** Apr 20 2022 *Doing Math with Python* shows you how to use Python to delve into high school-level math topics like statistics, geometry, probability, and calculus. You'll start with simple projects, like a factoring program and a quadratic-equation solver, and then create more complex projects once you've gotten the hang of things. Along the way, you'll discover new ways to explore math and gain valuable programming skills that you'll use throughout your study of math and computer science. Learn how to: -Describe your data with statistics, and visualize it with line graphs, bar charts, and scatter plots -Explore set theory and probability with programs for coin flips, dicing, and other games of chance -Solve algebra problems using Python's symbolic math functions -Draw geometric shapes and explore fractals like the Barnsley fern, the Sierpinski triangle, and the Mandelbrot set -Write programs to find derivatives and integrate functions Creative coding challenges and applied examples help you see how you can put your new math and coding skills into practice. You'll write an inequality solver, plot gravity's effect on how far a bullet will travel, shuffle a deck of cards, estimate the area of a circle by throwing 100,000 "darts" at a board, explore the relationship between the Fibonacci sequence and the golden ratio, and more. Whether you're interested in math but have yet to dip into programming or you're a teacher looking to bring programming into the classroom, you'll find that Python makes programming easy and practical. Let Python handle the grunt work while you focus on the math. *Uses Python 3*

**Seinfeld and Philosophy** Jun 22 2022 How is Jerry like Socrates? Is it rational for George to "do the opposite?" Would Simone de Beauvoir say that Elaine is a feminist? Is Kramer stuck in Kierkegaard's aesthetic stage? *Seinfeld and Philosophy* is both an enlightening look at the most popular sitcom of the decade and an entertaining introduction to philosophy via Seinfeld's plots and characters. These fourteen essays, which explore the ideas of Plato, Aristotle, Lao-Tzu, Heidegger, Kant, Marx, Kierkegaard, Nietzsche, Sartre, and Wittgenstein, will show readers how to be masters of their philosophical domain.

**Disaster Status** May 21 2022 Charge nurse Erin Quinn escaped personal turmoil to work on the peaceful California coast. The Old Fairy Tales Jul 23 2022

Fairy Tales of the Allied Nations - Illustrated by Edmund Dulac Apr 08 2021 Fairy Tales of the Allied Nations is stunning work, produced in the midst of the First World War, by a true genius of illustration. It was originally published in 1916, and contains a collection of folk and fairy tales from Belgium, France, England, Japan, Italy, and Serbia. It contains 'The Buried Moon' (An English Fairy Tale), 'The Serpent Prince' (An Italian Fairy Tale), 'Ivy and the Chestnut Horse' (A Russian Fairy Tale), 'The Hind of the Wood' (A French Fairy Tale), 'The Story of the Bird Feng' (A Chinese Fairy Tale), and more. Dulac was a French-born, British naturalised magazine illustrator, book illustrator and stamp designer, who despite his increasing years, wished to help the war effort in any way he could. The drawings of Fairy Tales of the Allied Nations are delicately drawn, notable for their classic fairy tale charms and Japanese stylistic influence. The skilfully coloured images further refine the enchantingly simple story telling - all presented together in this text. It is a book to be enjoyed by both young and old; a beautiful object, produced at a time of great peril. Pook Press celebrates the great 'Golden Age of Illustration' in children's literature - a period of unparalleled excellence in book illustration from the 1880s to the 1930s. Our collection showcases classic fairy tales, children's stories, and the work of some of the most celebrated artists, illustrators and authors.
